# Solitude IGR™

An Effective Weapon in the Fight Against Flies

[www.SolitudeIGR.com](http://www.SolitudeIGR.com)

<sup>1</sup> Based on information received from entomology experts at state universities and extension offices and data from the National Oceanic and Atmospheric Administration and the National Climatic Data Center. Emergence of flies is highly dependent on temperature and humidity and may vary from year to year. Owners should begin using Solitude IGR four to six weeks before fly emergence in their area for best results.
